

```
#include <stdio.h>
#include <conio.h>
int main()
{

    float c,f;
    clrscr();
    printf("Enter the temp in fahrenheit");
    scanf("%f",&f);
    c=(f-32)*5/9;
    printf("The temp in celcius is %f",c);
    getch();
    return 0;
}
```

Output :

```
Enter the temp in fahrenheit 212
The temp in celcius is 100.000000
```
