

```
#include<stdio.h>
#include<conio.h>
```

```
int main()
{
    int a,i=0;
    printf("Enter the number to check the squares:");
    scanf("%d",&a);
    int sum=0;
    do
    {
        if(i%2!=0)
        {
            sum=sum+(i*i);
        }
        i++;
    }
    while(i<=a);
    printf("The sum of squares of odd numbers till %d is : %d",a,sum);
    return 0;
}
```

Output:

```
Enter the number to check the squares:7
The sum of squares of odd numbers till 7 is : 84
Process returned 0 (0x0)   execution time : 2.081 s
